

Art-Teas-Tree Cafe — Project Proposal

A digital home for the cafe, the artists, and the adda. Three tiers, three commitments. Pick what fits today; grow into the next when you're ready.

Prepared for: Art-Teas-Tree Cafe, Bidhan Nagar, Kolkata **In association with:** the Mime Institute of Calcutta **Prepared by:** [Your Studio Name] **Date:** May 2026

What you are seeing today

The live demo we are walking you through is a hybrid build. The complete visual identity — the Satyajit Ray-meets-Shantiniketan aesthetic, the cinematic scroll, the Bengali typography woven through, the mobile-first layout — is fully realised. You can scroll the manifesto, browse the menu, meet the artists, and feel exactly what your customers will feel when the site goes live.

From here, you choose one of three development paths. Each path is a complete, polished product in its own right. They are not phases — they are options.

Demo 1 — The Digital Dokan

Essential digital identity. Zero ongoing admin work.

This tier gives Art-Teas-Tree a beautiful, cinematic web presence and a frictionless QR menu system. It is the smallest commitment we offer, and it is still a complete product.

What's included

- **Full landing page** in the Retro Kolkata aesthetic — Hero, Philosophy, the full Manifesto, the Boipara (Books) corner, and Footer.
- **Dynamic QR menu** — printed QR codes for each table that open a mobile-optimised menu when scanned.
- **Google Sheets CMS for the menu** — you edit a private Google Sheet from your phone. Change a price, mark something out of stock, add a new tea — the website updates within seconds. No code, no admin panel, no dependency on us.
- **Mobile-first design** — the menu is built for the small screen first, then scaled up.
- **Basic SEO** — meta tags, social cards (Open Graph), sitemap so the cafe shows up in Google search.

What's not included

- Artist directory or Natyamancha section
- Form submissions, online ordering, reservations
- Email capture or newsletter
- Photo galleries beyond the cafe photos already in the design

Investment

Item	Amount
One-time build	₹10,000
Domain (annual, paid to registrar)	~₹800–1,200
Hosting	Free tier (Vercel/Netlify)
Ongoing admin work from you	Editing a Google Sheet when needed

Why this costs what it does

Building a cinematic, hand-crafted website with the Retro Kolkata aesthetic is significantly more design-intensive than a templated cafe site. The price covers the custom frontend development, the cultural layering of the design, mobile responsiveness, the QR menu route, and the Google Sheets integration that turns your menu into a self-serve CMS. We hold this price low because we believe in the project — it is the foundation we want for every cafe we work with in Kolkata.

Demo 2 — The Ensemble (*our recommendation*)

Everything in Demo 1, plus your artists become part of the website.

This tier brings the Mime Institute's artist community onto the cafe's digital surface. It turns the website from a brochure into a noticeboard — a place where patrons learn about the people who perform and teach in your space.

What's included

- **Everything in Demo 1** — landing page, QR menu, Sheets CMS.
- **Natyamancha (The Stage) section** — a masonry-style postcard grid integrated directly into the cafe's main site.
- **Unlimited artists** managed via Google Sheets. Five artists are featured prominently as vintage postcards on the main page; the rest appear inside a "See the full roster" popup that opens on the same page, showing every artist with their photo, craft, bio, and contact link.
- **Artist cards** — each featured artist has a photo, name, craft (mime, poet, musician, etc.), a short bio, and a contact link.
- **"Take the Stage" button** — interested artists can express interest via a contact form that emails the cafe directly.
- **Dual Google Sheets pipeline** — one tab for the menu, another for the artists. To rotate an artist out or add a new one, you simply edit the sheet. The site updates automatically.

What's not included

- Search or filtering across artists (the full-roster popup is a scrollable list; for filters and search you would want Demo 3)
- Dedicated artist profile pages (each artist is a card or list entry, not a full page)
- Artist self-submission (artists still contact you; you decide who appears)
- A dedicated subdomain or web app for the artist directory (that is Demo 3)

Investment

Item	Amount
One-time build	₹22,000
Domain (annual, paid to registrar)	~₹800–1,200
Hosting	Free tier (Vercel/Netlify)
Ongoing admin work from you	Editing two Google Sheets when needed

Why this costs what it does

The artist section adds a second data pipeline, requires careful design for the postcard layout, the full-roster popup, and the contact modal, and involves heavier image-handling work (resizing artist photos for performance, lazy loading, optimising for mobile). The Sheets-to-website pipeline has to be more robust because two streams of content now flow through it. The price reflects roughly twice the build time of Demo 1, while keeping the same zero-admin promise.

Why we recommend this tier

Of the three, Demo 2 best captures the *identity* of Art-Teas-Tree. The cafe is not just a tea stall — it is a stage. Without the artists visible on the website, the connection to the Mime Institute reads as a line in the footer. With them visible, the website becomes a true reflection of what the space is for. And because everything still runs on Google Sheets, you carry no operational burden.

If, in twelve to eighteen months, the artist directory outgrows ten slots or you start getting booking inquiries from outside Kolkata, we have a clear path to upgrade you to Demo 3 without rebuilding from scratch.

Demo 3 — The Cultural Hub

A dedicated, searchable artist platform. A web application, not a website.

This tier separates the cafe's main site from a fully interactive artist directory hosted at its own subdomain (for example, artists.artteastree.com). It is the right choice if the artist community becomes a destination in its own right — if event organisers, venues, or patrons should be able to discover talent independently of the cafe.

What's included

- **Everything in Demo 1** — landing page, QR menu, Sheets CMS for the menu.
- **A dedicated artist directory** at its own subdomain.
- **On the main cafe site**, the Natyamancha section becomes a beautifully designed redirect card that sends visitors to the directory.
- **Interactive search and filters** — patrons can find artists by craft (mime, musician, poet), language, availability, or location.
- **Unlimited artist profiles** — every artist gets a dedicated profile page with their full bio and portfolio.
- **Artist self-submission** — artists apply through a form with email verification; you approve them through an admin dashboard.

- **Custom admin dashboard** — you (or a Mime Institute representative) approve, edit, or remove artists from a clean, simple interface.
- **Image upload pipeline** — artists upload their own photos, which are automatically resized and optimised.

Three sub-options within Demo 3

Sub-option	Investment	Difference
Lean	₹50,000	Basic search with two filters, approval done through Supabase's built-in interface (no custom admin UI)
Recommended	₹75,000	Custom admin dashboard, four filters, email-verified submissions, ~30-artist starting roster
Full polish	₹1,10,000	Above + per-artist portfolio galleries, booking-request form for event organisers, analytics dashboard, Bengali/English UI toggle

Subscription (required for Demo 3)

A live web application has ongoing operational costs — hosting, the database, security updates, backups, occasional fixes. The subscription covers all of this so your platform stays online, fast, and secure without surprise bills.

Tier	Monthly	What's covered
Hosting only	₹999/mo	Database + hosting + domain renewal + uptime monitoring
Standard (recommended)	₹1,999/mo	Above + 2 hours/month of changes, security updates, monthly database backups, email support within 48 hours
Pro	₹3,499/mo	Above + 5 hours/month, quarterly feature additions, priority support, Google Analytics integration

To put ₹1,999/mo in context: that is roughly the value of two coffee orders per day at the cafe. Once the directory has even modest traffic, the hosting tier alone will cost close to that — the subscription ensures your platform always has the resources it needs.

Why this costs what it does

Demo 3 is fundamentally a different category of product from Demos 1 and 2. The leap in price reflects:

- A real database (Supabase / PostgreSQL) replacing the Google Sheets CMS for the artist directory
- Authentication and approval workflows so artists can submit themselves safely
- A custom admin dashboard built specifically for your approval workflow
- Search indexing and filtering logic that performs well as the directory grows
- A secondary user interface (the directory itself) at a separate subdomain
- Ongoing operational responsibility on our end — uptime, backups, security patches

This is the price of moving from a website to a platform.

Demo 4 — The Concierge

Everything in Demo 3, plus an AI chatbot that books artists, answers menu questions, and acts as a 24/7 cultural guide — in English, Bengali, and Hindi.

Demo 4 is the top of the ladder. It is the right choice when the cafe and the artist directory together become a destination — when event organisers want to discover artists at 2 AM, when visitors want to know what's vegan before they arrive, when patrons ask "what's adda?" and the cafe wants to answer them warmly without staff lifting a finger.

What's included

- **Everything in Demo 3** (Recommended sub-tier) as the base.
- **A floating chat widget on every page** of both the main cafe site and the artist directory subdomain. The widget is designed in the cafe's aesthetic — it does not feel like a generic SaaS bot bolted onto your site.
- **Artist booking flow** — a visitor says "I need a mime artist for a corporate event in December", the chatbot asks the right follow-up questions, surfaces matching artists from your directory with their availability, captures the visitor's contact details, and forwards the lead to you.
- **Menu questions answered** — "what's vegan?", "do you have anything without caffeine?", "what should I try if I like ginger?" — answered automatically from your live menu.
- **Cafe FAQ** — opening hours, location, parking, group bookings, dietary needs, private events. The chatbot knows the answers so you don't have to keep typing them out.
- **Cultural concierge** — visitors curious about adda, lyadh, bhar, or the Mime Institute connection get warm, accurate explanations in the cafe's voice. This is your story, told at scale.
- **Trilingual conversation** — English, Bengali (Bangla script), and Hindi (Devanagari script). The bot replies in whatever language the visitor uses.
- **Lead capture** — every artist booking inquiry, every private-event request, every reservation intent is logged and emailed to you.
- **Owner conversation dashboard** — you can see every chat that happens. This is a free demand-research tool: what are people asking about? What artists are most in demand? What is your audience curious about?
- **Reservation intent capture** — "table for 4 on Saturday at 7" — the chatbot collects the request and sends it to you. (Note: this captures the *intent*; live availability checking requires a separate POS integration.)

Three sub-options within Demo 4

Sub-option	Investment	Difference
Lean	₹1,15,000	English-only, capped at 300 conversations/month, simpler widget, no owner dashboard
Recommended	₹1,35,000	Trilingual (English/Bengali/Hindi), 1,000 conversations/month, owner dashboard, full lead capture, cultural FAQ
Full polish	₹1,70,000	Above + voice input for visitors who prefer to speak, sentiment analytics, monthly performance reports, custom persona tuning

Subscription (required for Demo 4)

Running an AI chatbot has real, ongoing costs — the AI provider charges per conversation, the database keeps growing, and the chatbot's quality needs occasional tuning. The subscription covers all of this so the experience stays sharp and responsive.

Tier	Monthly	What's covered
Standard	₹3,499/mo	All Demo 3 Standard benefits + AI usage capped at 1,000 conversations/month + monthly chatbot transcripts report
Pro (recommended for Demo 4)	₹5,999/mo	Above + uncapped conversations + quarterly chatbot tuning + sentiment analytics dashboard + 24-hour priority support
Enterprise	₹9,999/mo	Above + custom integrations (POS, calendar, CRM), monthly performance review call, dedicated account manager

Why this costs what it does

Demo 4 is genuinely a new layer of product. The investment reflects:

- A floating, mobile-friendly chatbot widget designed in the cafe's aesthetic — not a stock SaaS component
- Connecting the chatbot to a real AI model (Claude Haiku 4.5) with streaming responses so conversations feel natural
- The ability to ground every answer in your real menu and real artist directory — no AI-invented dishes or fictional artists
- Multilingual prompt engineering and testing in English, Bengali, and Hindi
- A conversation logging system and an owner dashboard so you see what your audience is asking
- Lead capture and email forwarding so booking inquiries reach you the moment they happen
- Hardening against abuse and prompt manipulation
- Ongoing responsibility for the AI's quality, uptime, and cost — handled inside the subscription

Who Demo 4 is right for

Demo 4 is the right answer if **your artists become a destination in their own right** — if event organisers, wedding planners, corporate booking agents, or out-of-Kolkata patrons start finding the cafe through the artist directory and want to engage at scale. It is also right for cafes that see the chatbot as a cultural extension of the space, not just a support tool.

Demo 4 is **not the right answer** if you mostly want a beautiful website and a working QR menu. For that, Demos 1 or 2 are a better fit, both in cost and in operational simplicity.

At a glance: comparing the four tiers

	Demo 1	Demo 2	Demo 3 (Rec.)	Demo 4 (Rec.)
Landing page + manifesto	✓	✓	✓	✓

	Demo 1	Demo 2	Demo 3 (Rec.)	Demo 4 (Rec.)
QR menu with Sheets CMS	✓	✓	✓	✓
Artist section on main site	—	✓ (5 featured + roster popup)	Redirect to directory	Redirect to directory
Dedicated artist directory	—	—	✓	✓
Search & filter for artists	—	—	✓	✓
Artist self-submission	—	—	✓	✓
Admin dashboard	—	—	✓	✓
AI chatbot (multilingual)	—	—	—	✓
Artist booking via chat	—	—	—	✓
Owner chat-log dashboard	—	—	—	✓
Artist limit	N/A	Unlimited	Unlimited	Unlimited
One-time investment	₹10,000	₹22,000	₹75,000	₹1,35,000
Monthly subscription	None	None	₹1,999/mo	₹5,999/mo
Time to launch	2 weeks	3–4 weeks	6–8 weeks	10–12 weeks

Upgrade path

The technical architecture is built so you can grow between tiers without losing work. If you choose Demo 1 today and want to add the artist section in six months, you do not rebuild the site — we extend it.

Demo 1

→

Demo 2

→

Demo 3

→

Demo 4

₹10,000

+₹15,000
upgrade

+₹60,000
upgrade

+₹55,000
upgrade

Upgrades carry forward all the work done in the previous tier. Demo 2 → Demo 3 credits the artist work; Demo 3 → Demo 4 layers the chatbot onto your existing directory without rebuilding anything underneath. The subscription updates accordingly when you upgrade into a tier that requires one.

What we recommend

Start with Demo 2.

It captures the heart of Art-Teas-Tree — the cafe *and* the artists — while keeping your administrative work to almost nothing. Updating a Google Sheet from your phone is something every team member can learn in five minutes. There is no admin login to manage, no platform to maintain, no learning curve.

Demo 3 is a beautiful product, but it is the right answer only when the artist directory becomes a destination in its own right — when you start hearing "I found this poet through your website" from people who have never visited the cafe. Until that happens, Demo 2 is a better fit and Demo 3 is a clear, planned next step.

Demo 4 is the ceiling. It belongs to a future version of Art-Teas-Tree where the cafe and its artists together serve a real audience of patrons, organisers, and bookers across (and beyond) Kolkata. We have included it in this proposal so you know exactly where the road leads — but we are not recommending you start there.

If budget is the deciding factor, Demo 1 is still a complete, polished product. It does not include the artist section, but the cafe identity, the manifesto, and the QR menu are all there in full.

What we need from you before we start

Once you have chosen a tier, we will need a few things from you to begin:

1. **A domain name** — we recommend artteastree.com or artteastreecafe.com. You buy this directly from a registrar (Namecheap, GoDaddy, etc.) so you own it. We help with the setup.
2. **Cafe photographs** — we have the four images you shared. More high-quality photos of the interior, the bhar, the books corner, and (if available) the artists at work would deepen the design.
3. **Final menu copy** — item names (English and/or Bengali), descriptions, prices. For Demo 2, the same for the 10 artists you want featured first.
4. **Cafe email address** — for receiving "Take the Stage" inquiries, customer messages, and the Google Sheet sharing.
5. **Brand approvals** — a sign-off on the final landing page design before we go live.
6. **Artist photo consent** — for Demo 2 and Demo 3, written consent from each featured artist that their photo and details may appear on the website.

Payment terms

- **Demos 1 and 2:** 50% on contract signing, 50% on launch.
- **Demo 3:** 40% on contract signing, 30% on admin dashboard delivery, 30% on launch.
- **Demo 4:** 35% on contract signing, 30% on admin dashboard delivery, 20% on chatbot integration milestone, 15% on launch.
- **Subscription (Demos 3 and 4):** Billed monthly, first month due at launch.
- **All payments:** UPI / bank transfer. GST-compliant invoices provided.

If you ever want to leave

We want to be your partner, not your hostage. If you ever choose to discontinue:

- **Demos 1 and 2:** you own the code and can host it anywhere. We will provide a complete handover including the Google Sheets, the deployed site, and the source code.
- **Demo 3 subscription:** 30 days notice. We provide a full export of your artist database (CSV and JSON). The site stays in read-only mode for 60 days so you have time to migrate before anything is taken down. You keep all rights to your artist data and uploaded content.
- **Demo 4 subscription:** 30 days notice. We provide a full export of your artist database AND your complete chatbot conversation history (CSV and JSON). The chatbot widget is disabled within 24 hours of cancellation; the rest of the site continues exactly as in Demo 3 read-only mode. You keep all rights to your data, conversation logs, and uploaded content.

A small glossary

For team members or stakeholders less familiar with the design language we have used:

Term	Meaning
<i>Adda</i> (আড্ডা)	Bengali tradition of long, agenda-less conversation. The cafe's central value.
<i>Cha er dokan</i> (চায়ের দোকান)	Roadside tea stall. The cultural reference the cafe's design is built on.
<i>Bhar</i> (ভাঁড়)	The disposable clay cup used for tea in Kolkata. A recurring visual motif in the design.
<i>Boipara</i> (বইপাড়া)	The book district — College Street in Kolkata. The "Books Corner" section is themed around this.
<i>Natyamancha</i> (নাট্যমঞ্চ)	The theatre stage. Name we have given the artist section.
<i>Reel</i> (রিল)	The current photo gallery section, designed as a director's camera viewfinder.
CMS	Content Management System — for Demos 1 and 2, this is simply Google Sheets.

Next steps

1. Decide which tier feels right for where the cafe is today.
2. Sign-off and 50% (or 40%) deposit gets us started.
3. We aim to have Demo 1 live in 2 weeks, Demo 2 in 3–4 weeks, Demo 3 in 6–8 weeks, and Demo 4 in 10–12 weeks from contract signing.

Whichever tier you choose, the goal is the same: a digital home for Art-Teas-Tree that feels like the cafe itself. Warm. Imperfect. Textured. Deeply human.

We are happy to walk through any of this in person — over a bhar of tea, of course.
